## EXAMINER'S AMENDMENT AND STATEMENT OF REASONS FOR ALLOWANCE

### *Examiner's Amendment*

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John Gallagher (Reg. No. 47234) on 4/26/2005.

2. The application has been amended as follows:

1. (Currently Amended) A remote monitoring apparatus comprising:
  - a control/monitoring unit for remote monitoring;
  - a mobile communication terminal for performing a call service, for performing an image processing/transmission service, and for receiving a posture and position control command over a wireless network;
  - an independent camera for photographing a subject;
  - a first dynamic support for mounting the mobile communication terminal and for receiving the posture and position control command from the mounted mobile communication terminal, and for performing local wireless communication of retransmitting the posture and position control command; and

a second dynamic support located in a remote place to be monitored and having the independent camera detachably mounted on the second dynamic support, for controlling a posture of the mounted camera and positional movement of the second dynamic support upon receiving the retransmitted posture and position control command via the first dynamic support for the mounted mobile communication terminal.

***Examiner's Statement of Reasons for Allowance***

3. Claims 1-3 and 5 are allowed.

4. The following is an examiner's statement of reasons for allowance:

Applicant's invention is drawn to a remote monitoring apparatus for inexpensively performing remote monitoring using a mobile videophone (i.e., a mobile videophone mounted on a first dynamic support for performing a call service, for receiving a posture and position command from a remote control monitoring unit through a long-distance wireless communication, such as wireless Internet, and for compressing and transmitting a moving picture to the remote control monitoring unit, wherein the first dynamic support is equipped with a first Bluetooth module for performing a local short distance wireless communication of forwarding the posture and position command to a second dynamic support, and the second dynamic support has an independent camera detachably mounted thereon for controlling a posture of the independent camera and positional movement of the second dynamic support upon receiving the forwarded posture and position command from the first dynamic support via a second Bluetooth module incorporated with the second dynamic support).

Applicant's independent claims 1 and 3 each recite, *inter alia*, a remote monitoring apparatus with a structure as defined in the specification (pages 3-11) including a mobile communication terminal for performing a call service, for performing an image processing/transmission service, and for receiving a posture and position control command over a wireless network, an independent camera for photographing a subject, a first dynamic support for mounting the mobile communication terminal and for receiving the posture and position control command from the mounted mobile communication terminal, and for performing local wireless communication of retransmitting the posture and position control command, and a second dynamic support located in a remote place to be monitored and having the independent camera detachably mounted on the second dynamic support, for controlling a posture of the mounted camera and positional movement of the second dynamic support upon receiving the retransmitted posture and position control command via the first dynamic support for the mounted mobile communication terminal. Applicant's claims 1 and 3 comprise a particular combination, which is neither taught nor suggested by the prior art.

Accordingly, Applicant's claims are allowed for these reasons and for the reasons recited by Applicant in Amendments filed 12/2/2003, 5/28/2004, 12/9/2004, and 5/2/2005

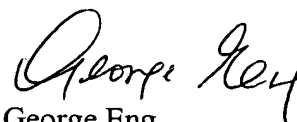

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
